## Consistency in image generation

In this section, you will be asked to evaluate which group of images contain the same character?
**Factors that you should consider: face features, eye color, hair color**
**Factors that you shouldn't consider: clothes, pose, background, image quality, style**

You are allowed to select multiple choices if you think some groups are good to produce the same character. but at least one choice should be made.

Which group of images contain the same character? (At least choose one, multiple choices allowed) *
